

States with travel restrictions upon entry to Rhode Island : English		
If you are coming to Rhode Island from one of the states listed below with a positivity rate of COVID-19 greater than 5%, you are required to self-quarantine for 14 days while in Rhode Island. As an exception, you may provide proof of a negative test for COVID-19 that was taken within 72 hours prior to arrival in Rhode Island. If you receive a test during your quarantine in Rhode Island and get a negative test result, you can stop quarantining. However, you still need to self-monitor for symptoms of COVID-19 for 14 days, wear a mask in public, and follow physical distancing guidelines. You also must quarantine while waiting for a negative test result.		
Quarantining for 14 days is always preferred over relying on a negative test result as quarantining is the best way to limit the possibility of spreading COVID-19.		Source: Johns Hopkins University as of 10/12/2020
