

Phased Guidelines for the General Public and Businesses to Maximize Public Health and Economic Reactivation

This is an addendum to [Utah Leads Together 2.0](#)¹. The Governor’s Office of Management and Budget and the Utah Department of Health, with assistance from Leavitt Partners, have developed recommendations to support the roadmap for reactivation of the Utah economy while stabilizing public health.

Overview of Guidelines for the General Public and Employers	2	Church Services.....	6	Gyms & Fitness Centers (including indoor recreation centers, yoga studios, dance, tumbling, indoor soccer, etc.)	13
Tiered Guidelines for High-Risk Individuals	4	Tiered Recommendations for Businesses and Employees	7	Construction, General Contractors & Manufacturing.....	13
Actions by High-Risk Individuals	4	General Employer Guidelines Intended for Use in All Industries.....	7	Day Care	13
Interactions with High-Risk Individuals	4	Restaurants, Food Service Establishments, Bars, Food Trucks, Convenience Stores ...	8	Intensity of Disruption	14
Households with High-Risk Individuals	4	Retail, including Grocery Stores, Pharmacy, Convenience Stores	9	Hospital Settings and Ambulatory Surgical Facilities	14
Tiered Guidelines for the General Public.....	5	Hospitality, Tourism & Accommodations.....	10	Non-hospital Setting, including Dentistry	14
Social Guidelines	5	Events, Cultural Arts & Entertainment (including Sporting Events, Concerts, Rodeos, Convention Centers, Theatres, Museums, Zoos, Aquariums, Aviaries, Botanical Gardens, Libraries, Indoor Arenas).....	11	General Guidelines for Employers	15
Use of Face Coverings	5	Personal Services (including barbers, cosmetologists, body artists, nail technicians, tanning, etc.).....	12	Best Practices for Employers.....	15
Family Gatherings (e.g. Funeral, Wedding, Religious Ceremonies).....	5	Home Repair	12	Cleaning & Hygiene Guidelines for Employers	15
Children, including Playgrounds.....	5			Employers Monitoring Symptoms ⁹	15
Outdoor Recreation. including Parks, Playgrounds, Pavilions, Parades.....	5			Appendix: Guidelines for Dine-in Restaurants Open in Orange & Yellow	16
Pools, Water Parks, Spas.....	6

Phased Guidelines for the General Public and Businesses to Maximize Public Health and Economic Reactivation

High Risk

- Groups must be restricted to groups of 10 unless a wall can physically separate each group
- Limit mixing the groups of children (keep in separate rooms, allow on the playground at different times)
- Curbside drop off and pick up
- All individuals must wash hands with soap and running water upon arrival
- Don't use toys that can't be washed and disinfected
- Children and staff should stay home if they're sick
- Children and staff are screened for symptoms
- If there is a confirmed case, facility must be closed and alert local health department
- All high-touch surfaces should be cleaned and disinfected after each use (e.g., toys, keyboards, desks, remote controls)

Moderate Risk

- Groups must be restricted to groups of 20 unless a wall can physically separate each group
- Limit mixing the groups of children (keep in separate rooms, allow on the playground at different times)
- Curbside drop off and pick up
- All individuals must wash hands with soap and running water upon arrival
- Don't use toys that can't be washed and disinfected
- Children and staff should stay home if they're sick
- Children and staff are screened for symptoms
- If there is a confirmed case, facility must be closed and alert local health department
- All high-touch surfaces should be cleaned and disinfected after each use (e.g., toys, keyboards, desks, remote controls)

Low Risk

- Children from the same household are kept in the same group whenever possible
- Don't use toys that can't be washed and disinfected
- All individuals must wash hands with soap and running water upon arrival
- Children and staff should stay home if they're sick
- Children and staff are screened for symptoms
- If there is a confirmed case, facility must be closed and alert local health department
- All high-touch surfaces should be cleaned and disinfected regularly
- The provider must restrict offsite activities to places or environments where social distance and proper cleaning practices can be controlled

Intensity of Disruption	
Hospital Settings and Ambulatory Surgical Facilities	Each hospital and ambulatory surgical center operating in Utah shall follow the protocols developed by the Utah Hospital Association in consultation with the Utah Department of Health, titled “ Utah Hospital Roadmap for Resuming Elective Procedures 2.0 ”
Non-hospital Setting, including Dentistry	Adhere to all protocols set forth in the following state public health order: https://coronavirus-download.utah.gov/Health/state%20public%20health%20order.20.04.21.pdf

General Guidelines for Employers

Best Practices for Employers

- Those who are, or work with, high-risk populations, should undergo daily screening/symptom⁹ monitoring, and be tested if they begin to experience COVID-19 symptoms. High-risk populations should take extra precautions to avoid close contact with multiple people
- Use online conferencing, email, or telephone in place of in-person meetings, even when people are in the same building
- Employees and customers should not congregate in groups; if your business involves a waiting area, customers should wait outside or in their cars
- Encourage contactless pay options if possible; otherwise immediately disinfect transaction equipment
- Make regular announcements to remind employees and customers to follow distancing guidelines. Use floor markings to mark appropriate physical distance where appropriate
- Encourage digital files rather than paper formats (e.g. documentation, invoices, inspections, forms, agendas)
- Consider what reserve supplies may be necessary to obtain (e.g., cleaning supplies, gloves or other protective equipment)
- Consider the possibility of interruptions to water or power that might force closure
- Establish and maintain open dialogue with local communities, including key vendors and suppliers, exploring contingencies and sharing appropriate decisions about foodservice, transportation, and other services
- Identify a workplace coordinator who will be responsible for COVID-19 issues and their impact in the workplace
- If relevant, update emergency communication plan with key contacts and backups, chain of communications, and processes for tracking and communicating; share the response plan with employees and communicate expectations
- Ensure every employee’s contact information and emergency contact details are up to date; ensure a plan is in place to reach employees quickly
- Educate workforce about the threat of the COVID-19 pandemic, what the business is doing, and what they should do to protect themselves and their families
- Prepare for absenteeism—not only sick employees will stay home; others may need to care for the sick or children if schools close; those employees should notify their supervisors
- Provide signage at each public entrance to inform all employees and customers that they should:
 - Avoid entering if they have a fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste, or feel generally unwell
 - Maintain a minimum 6-foot distance
 - Sneeze/cough into cloth, tissue, elbow or sleeve (not hands)
 - Avoid hand shaking or unnecessary physical contact
 - Wash hands often, and for at least 20 seconds
 - Wear face coverings

Cleaning & Hygiene Guidelines for Employers

- Promote etiquette for coughing, sneezing, and handwashing; avoid touching face, especially eyes, nose, and mouth; place posters that encourage hand and respiratory hygiene
- Face coverings should be worn by employees and patrons, especially when difficult or impossible to maintain 6-foot distance
- Ensure adequate air circulation and post tips on how to stop the spread of germs
- When possible, discourage sharing of work tools and equipment
- Make a list of high-touch surfaces requiring routine disinfecting and perform routine environmental cleaning (e.g., elevator buttons, workstations, countertops, handrails, doorknobs, breakrooms, bathrooms, common areas), either twice a day or after each use. Keep a logbook of cleaning regimen. Those cleaning should:
 - Wear gloves
 - Prior to disinfecting, clean surfaces with soap and water if soiled
 - Use EPA-approved disinfectant, industrial cleaner, diluted bleach, or alcohol solutions
- Provide disposable disinfecting wipes for employee use on high-touch surfaces; provide no-touch trash bins
- Laundry: wear gloves, use warmest appropriate water setting, dry items completely, do not shake dirty laundry, launder items that have come in contact with COVID-19 separately
- Make hand sanitizer, soap and water, or effective disinfectant readily available. Provide pop-up handwashing stations or facilities where necessary (e.g. open houses, construction sites)
- Personal Protection Equipment (PPE) should not be shared and should be disposed of properly
- After using gloves, employees should wash their hands

Employers Monitoring Symptoms⁹

- Employees who are sick or who appear to have COVID-19 symptoms should be separated from other employees/customers immediately and sent home; immediately clean and disinfect areas the sick employee visited
- Train managers/leadership to spot symptoms of COVID-19 and to be clear on relevant protocols
- Monitor employee symptoms, especially fever (100.4 degrees Fahrenheit/38 degrees Celsius, or above). If employees take simple medications such as acetaminophen, ibuprofen, or aspirin, they should take temperature beforehand
- Do not allow employees to come to work if they feel sick; create or maintain non-punitive leave policies so employees do not feel pressured to come to work if they are sick. Remind employees to report any illness to a manager, especially if sick with fever, cough, trouble breathing, sore throat, muscle aches and pains, sudden changes in smell or taste
- If an employee is confirmed COVID-19 positive, employers should inform close contact employees while maintaining confidentiality; close contact employees should self-monitor for symptoms for 14 days

⁹ Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains

Appendix: Guidelines for Dine-in Restaurants Open in Orange & Yellow

Operational Practice

- Limit tables to groups of 10, preferably members of the same household
- Groups of patrons at a table must maintain a distance of 6 feet from patrons of other parties at all times. Either move tables or mark off tables not to be used
- In waiting areas, a 6-foot distance must be maintained between parties, whether indoor or outdoor
- Maintain signage to remind individuals from separate parties to stand at least 6 feet apart; waiting area has floor markers to indicate proper spacing
- Hosts preferably open doors for customers and guide them to their seats to prevent traffic or congregating; hand sanitizer available at door
- Recommendation that upon entry, hosts point guests to signage that includes the following information:
 - Outlines symptoms¹⁰ and encourages that if the patron, or someone they live with, has experienced COVID-19 symptoms, to please order takeout instead
 - Recommendation for high-risk individuals¹¹ to order takeout/delivery instead of dining in for the protection of that individual
- Manager checks each employee for symptoms before every shift with temperatures taken and asks if any member of the employee's household has tested positive for COVID-19 in the past 14 days. Log must be kept and available for inspection by the local health officer
- Staff must wear face coverings at all times and perform hand hygiene between interactions with each table
- Cups, lids, napkins and straws must be handed directly to customers by staff
- Do not place utensils on table until patron is seated
- Encourage contactless and non-signature payment; when not possible, card and payment stations must be sanitized after each use. Staff must sanitize hands between handling payment options and food/containers
- Staff avoid touching items that have been placed on the table (menus, plates, utensils, pens, cups, etc.). The table will be cleared by a dedicated staff member once all guests have left
- Dedicated staff member sanitizes the area occupied by customers upon departure including tables, menus, pens, salt and pepper shakers, etc. Consider use of disposable items if necessary
- The restaurant may not operate if PPE, EPA-approved disinfectants and sanitizers, soap, and other necessary cleaning supplies are not available; sanitizer is effective against COVID-19. Chlorine (bleach) at 100-200 ppm is recommended
- Hand sanitizer must be available immediately adjacent to bathrooms
- Close restaurant for cleaning and disinfecting in the morning, afternoon, and evening. Cleaning and disinfecting includes all tables, chairs, door handles, floors, bathrooms, and any high-touch surfaces
- Buffet and self-serve restaurants will provide utensils, cups, plates and other service items only from the counter where food is ordered. None of these items will be accessible to the public. Buffet style restaurants will provide servers who will serve the meals from buffet to limit exposure. Patrons will not be allowed within 6 feet of the food serving area
- Stagger workstations so employees are not facing one another and are 6 feet apart
- To-go boxes, pizza boxes, paper cups, and any other paper product that touches food must be treated as food
- Staff must use gloves when handling ready-to-eat foods (including ice). Gloves are not required when handling foods that have yet to be cooked
- Indoor playgrounds in restaurants remain closed

¹⁰ Symptoms include fever of 100.4 degrees Fahrenheit or above, cough, trouble breathing, sore throat, sudden change in taste or smell, muscle aches or pains

¹¹ High-risk individuals are defined as people 65 years and older, people who live in a nursing home or long-term care facility, people of all ages with underlying medical conditions, including lung disease or moderate to severe asthma, people who have serious heart conditions, people who are immunocompromised (many conditions can cause a person to be immunocompromised, including cancer treatment, smoking, bone marrow or organ transplantation, immune deficiencies, poorly controlled HIV or AIDS, and prolonged use of corticosteroids and other immune weakening medications), people with severe obesity, diabetes, chronic kidney disease undergoing dialysis, or liver disease
