COVID Alert PA

COVID Alert PA is a free and voluntary mobile app developed by the Pennsylvania Department of Health in partnership with NearForm, University of Pennsylvania and MIT Lincoln Laboratory using Apple and Google's Exposure Notification System. The app's features include an interactive COVID-19 symptom check-in, alerts for potential exposures to the virus, updates on the latest public health data about COVID-19 in PA and public health guidance for what to do if you have a potential exposure to COVID-19. The app is designed to ensure privacy of the user. It does not use GPS, location services or any movement or geographical information. It will never collect, transmit or store personal information. It is completely anonymous.

COVID Alert PA works in Pennsylvania, and when you travel to other locations in the United States including Delaware, Nevada, New Jersey, New York, North Carolina, North Dakota, Washington D.C., Wyoming, and some parts of California.

Department of State COVID-19 Travel Information

The Department of State advises all U.S. citizens to read the country-specific

[Travel Advisories](https://travel.state.gov/content/travel/en/traveladvisories/traveladvisories.html/)  [and](https://travel.state.gov/content/travel/en/traveladvisories/COVID-19-Country-Specific-Information.html)

[U.S. Embassy COVID pages](https://travel.state.gov/content/travel/en/traveladvisories/COVID-19-Country-Specific-Information.html)  [for updates on the impact of COVID-19 worldwide.](https://travel.state.gov/content/travel/en/traveladvisories/COVID-19-Country-Specific-Information.html)

The COVID-19 pandemic continues to affect countries differently. Challenges to any international travel at this time may include mandatory quarantines, travel restrictions, and closed borders. Foreign governments may implement restrictions with little notice, even in destinations that were previously low risk. If you choose to travel internationally, your trip may be severely disrupted, and it may be difficult to arrange travel back to the United States.

from the Department of State.

CDC COVID-19 Travel Information

Travel increases your chance of getting and spreading COVID-19. Staying home is the best way to protect yourself and others from COVID-19.

You can get COVID-19 during your travels. You may feel well and not have any symptoms, but you can still spread COVID-19 to others. You and your travel companions (including children) may spread COVID-19 to other people including your family, friends, and community for 14 days after you were exposed to the virus.

Don't travel if you are sick or if you have been around someone with COVID-19 in the past 14 days. Don't travel with someone who is sick.

Before You Travel

Before you travel, consider the following:

- **Is COVID-19 spreading [at your destination?](https://www.cdc.gov/covid-data-tracker/index.html#cases)**
The more cases at your destination, the more likely you are to get infected during travel and spread the virus to others when you return.
- **Do you live with someone who might be more likely to get very ill from COVID-19?**
If you get infected while traveling, you can spread the virus to loved ones when you return, even if you don't have symptoms.
- **Are you more likely to get very ill from COVID-19?**
Anyone can get very ill from the virus that causes COVID-19, but older adults and people of any age with certain underlying medical conditions are at higher risk for severe illness from COVID-19.
- **Does your destination have requirements or restrictions for travelers?**
Some state, local, and territorial governments have requirements, such as requiring people to wear masks and requiring those who recently traveled to stay home for up to 14 days. Check [state, local, and territorial health departments](https://www.cdc.gov/publichealthgateway/healthdirectories/healthdepartments.html) and local public health websites for information before you travel. If you are traveling internationally, check the country's Office of Foreign Affairs or Ministry of Health or the [US Department of State, Bureau of Consular Affairs, Country Information page](https://travel.state.gov/content/travel/en/international-travel/International-Travel-Country-Information-Pages.html) for details about entry requirements and restrictions for arriving travelers, such as mandatory testing or quarantine.
