County data monitoring

California is monitoring COVID-19 closely in each local community and keeping the public informed. We're teaming up with counties to fight it with every tool we have: current local data, testing, contact tracing, infection control, emergency supplies, containment measures, and more.

Counties should be ready to restore limitations if outbreaks increase. The State Public Health Officer may take action if needed.

Counties that have remained on the County Monitoring List for 3 consecutive days will be required to shut down **the following** industries unless they can be modified to operate outside or by pick-up. Bars must close all operations even if they are operating

outdoors. The closures will apply for a minimum of three weeks and are subject to an extension based on epidemiologic indicators.

- Restaurants

- Wineries and tasting rooms

- Movie theaters

- Family entertainment centers (for examples: bowling alleys, miniature golf, batting cages and arcades)

- Zoos and museums

- Cardrooms

The following counties have remained on the County Monitoring List for 3 consecutive days and must close indoor operations in certain sectors:

Affected counties as of 7/1/20

The State Public Health Officer may take additional action if needed.

Track county data and monitoring status

County attestation process

Local health jurisdictions that meet the criteria set forth by the California Department of Public Health and follow the process in the [county guidance](#) may move further ahead in the [Resilience Roadmap](#).

If a county decides to pursue a variance to move further ahead in the Resilience Roadmap, the local public health officer must:

1. Notify the California Department of Public Health (CDPH).
2. Certify through submission of a written attestation to CDPH that the county has met the readiness criteria (outlined below), including guidance to be issued by the county and detailed plans, and that the county is designed to mitigate the spread of COVID-19.

See the [list of counties](#) that have met the criteria.

The three steps below outline the county data monitoring process.
