States with travel restrictions upon entry to Rhode Island : Sheet1

self-monitor for symptoms of COVID-19 for 14 days, wear a mask in public, and follow physical distancing guidelines. You also must quarantine while waiting for a negative test result. **Quarantining for 14 days is always preferred over relying on a negative test result as quarantining is the best way to limit the possibility of spreading COVID-19.**	Source: Johns Hopkins University as of 8/31/20
